

Adriana

FLOOR & WALL TILES

Rich, moody and striking, the Adriana Green 400x600mm tile is designed to make a statement.

Featuring a herringbone pattern with deep green and earthy tonal variation, this tile delivers depth, texture and visual movement

Adriana Green has a porcelain body so it's ideal for feature walls, splashbacks or statement walls, as well as floors like entryways. Pair with natural timber, brass accents or stone for a refined, layered look with timeless appeal.

This tile is designed to be grouted in between the gaps meaning you can choose the best colour for your design.
