

TUNDRA

MONOLITHOS COLLECTION

TUNDRA

MONOLITHOS COLLECTION

For centuries the natural stone Tundra has been quarried from Mount Grey in the Isparta region of Western Turkey. This limestone becomes marble under intense mountain forming temperature and pressure, causing unique cloudlike patterns, in the grey and white veining. Our Tundra tile exhibits the best of this wonderful natural stone, with multiple faces giving you the pattern variation you need for authenticity.

The Tundra series is available in a Matt **SmoothGrip** finish, new with anti-slip tile technology and a smooth finish on both internal and external applications. It is also available in Lappato and Polished, with both finishes suitable for domestic and light commercial settings.
