Spica Tile Range

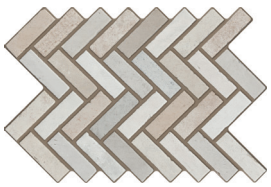

Spica

FLOOR & WALL TILES

Soft, earthy and beautifully balanced, the Spica 400x600mm Range has a timeless look that works seamlessly across both classic and contemporary interiors.

Featuring a herringbone pattern with gentle tonal variation, these tiles combine warm neutrals and subtle colour shifts to create texture.

The Spica Range has a porcelain body so it's ideal for feature walls, splashbacks or statement walls, as well as floors like entryways. This tile is designed to be grouted in between the gaps meaning you can choose the best colour for your design.
