FLOOR & WALL TILE

Fasa Arabescatto Blanco delivers timeless elegance with a soft white base enriched by flowing warm grey and subtle gold veining. Inspired by natural marble, its high variation creates a refined, organic look unique to every tile.

Fasa Amazonita Verde brings a bold, natural statement with striking turquoise-green tones interwoven with soft white veining and earthy mineral accents. This 600x1200mm matt tile features high variation making it reminiscent of natural stone.

The 600x1200mm format minimises grout lines for a seamless finish, while the matt surface offers a sophisticated, low-sheen texture, ideal for creating light-filled, luxurious interiors across both walls and floors.
